Frontend Development Certificate | 2015

PROFESSIONAL EXPERIENCE

Welcome Home | COO

2023 - Present

- Defined and articulated a product and service vision that aligned with business goals and market opportunities in food and catering, guiding menu roadmaps and long-term growth.
- Streamlined processes across the culinary journey — from order placement and ingredient sourcing to meal prep and delivery — improving efficiency, consistency, and on-time fulfillment.
- Launched tailored culinary offerings and service bundles that opened new customer segments in events, corporate catering, and private dining.
- Built research and feedback programs to capture dietary needs, culinary preferences, and event requirements; translated insights into menu adjustments and service improvements.
- Monitored culinary trends and competitor offerings to spot differentiation opportunities and prioritize innovation.
- Partnered with culinary partners, marketing, sales, and operations to coordinate product development, menu launches, and go-to-market adoption.
- Established and tracked key product and operational metrics to measure menu performance, customer satisfaction, and efficiency — using results to iterate and scale offerings.

B&H Photo Video | Product Manager**2023 - Present**

- Redesigned leasing workflow on high-traffic platform to eliminate funnel drop-off, driving 225% lift in application submissions, 50% completion rate improvement, and \$11.1M incremental revenue.
- Increased M365 software attach rates by 50% for computer purchases by redesigning the hardware-to-software cross-sell journey to better align with customer expectations and journey visibility.
- Owned the "Learn-and-Decide" customer journey for a high-traffic e-commerce platform (14M annual visitors); leveraged user interviews to overhaul technical specs and educational content, contributing to \$1.3B in annual sales.
- Built internal tooling and automated workflows that eliminated cross-functional production bottlenecks, cutting time-to-market for site-wide visual assets by measurable sprint cycles.
- Skilled at deploying A/B testing, behavioral data, and AI-integrated workflows to sharpen positioning, generate pipeline, and convert platform capabilities into measurable market growth. Optimized the post-purchase feedback loop using behavioral data, driving a 10% increase in customer-submitted reviews to enhance site-wide social proof.

Promenade | Senior Product Manager**2022 - 2023**

- Defined and executed product positioning strategy across engineering, design, sales, and marketing; translated competitive analysis and user research into roadmap decisions that accelerated time-to-market.
- Identified and prioritized new product features and enhancements, defining product requirements and creating user stories and use cases to drive product development.
- Collaborated closely with stakeholders, including engineering, design, sales, marketing, and customer success teams, ensuring seamless product delivery and driving product adoption.
- Analyzed product performance, customer feedback, and market trends to identify opportunities for product optimization and growth, implementing data-driven strategies to enhance product offerings.
- Effectively communicate product updates and progress to leadership, internal teams, and external partners, ensuring alignment and transparency throughout the organization

InternetBrands | Product Manager**2020 - 2022**

- Defined product roadmaps and prioritized features based on business goals, customer feedback, and market trends.
- Led cross-functional squads across engineering, design, and sales to ship new products and features from zero to launch, owning roadmap, requirements, and go-to-market sequencing.
- Created detailed product specifications, user stories, and wireframes to guide development and design efforts.
- Conducted user acceptance testing and ensured product quality and usability.
- Analyzed and reported on key product metrics, including user engagement, retention, and revenue growth.
- Provided ongoing product support and training to internal teams and external customers.
- Developed go-to-market strategies and collaborated with marketing and sales teams to drive product adoption and revenue growth.

Invision App | Product Manager

2018 - 2020

- Spearheaded the development of features for Freehand, ensuring its continuous improvement and market relevance.
- Oversaw the entire product development lifecycle, from conceptualization to launch, working closely with cross-functional teams to deliver a seamless user experience.
- Created actionable plans, work streams, and tactics to guide the product development process and ensure effective execution.
- Collaborated with key business, UX, and engineering stakeholders to gather insights and align product strategy with the company's objectives and user needs.
- Set the product's strategy, defining its direction and making informed trade-offs between features and speed-to-market.
- Developed and executed product roadmaps, fostering close collaboration with cross-functional teams to ensure timely and successful product delivery.
- Established, monitored, and measured success metrics post-launch, continuously evaluating the product's performance and iterating based on user feedback and behavior data.
- Refined products based on data-driven insights, creating new versions and updates that addressed user needs and drove product improvements.
- Actively integrated behavior data and customer feedback into the product development process, using these insights to inform decision-making and strengthen the overall product offering.

Cerner (Oracle Health)| Product Owner

2016 - 2018

- 0-to-1 Product Development: Led the end-to-end lifecycle for new EHR charting features, transitioning concepts into production-ready tools used by 5,000 clinicians.
- Medication Relationship Logic: Owned the strategy for complex medication data relationships, improving clinical decision support accuracy by 15% and streamlining medication reconciliation.
- Requirements & Documentation: Authored high-quality PRDs, user stories, and technical specifications for cross-functional engineering teams, reducing development rework.
- Roadmap & Prioritization: Managed a product backlog of 150+ items, utilizing data-driven prioritization to align feature delivery.
- Cross-Functional GTM: Partnered with Sales and Marketing to execute go-to-market plans for major releases, contributing to an increase in customer adoption rates for EHR charting.
- Compliance & Quality: Collaborated with clinical and legal teams to ensure all features met 100% of regulatory and safety requirements (e.g., ONC-ACB certification).

Refinery 29 | IT Systems Engineer

2015 - 2016

- Engineered and optimized mobile device management systems (Okta, Oomnitza, Jamf) for enhanced security and efficiency.
- Managed the scheduling and execution of computer updates and new software deployments, minimizing disruption.
- Delivered premium "white-glove" technical support (software, hardware, network) to internal employees.
- Provided dedicated on-call support for C-Level Executives and Founders of Refinery29.
- Utilized Trello and Jira for project tracking and developed roadmaps for new software rollouts.
- Created comprehensive technical documentation and user training materials.

Squarespace | Support Specialist**2012 - 2015**

- Handled high-volume support across email, chat, and social media, ensuring customers got fast, helpful answers regardless of the platform.
- Consistently hit a 90%+ CSAT score by focusing on quality resolutions and keeping response times as low as possible.
- Dived into deep technical troubleshooting for our SaaS platform, helping users navigate complex setups and advising them on web best practices.
- Built and led live online workshops from scratch, taking charge of everything from creating the presentation materials to hosting the live Q&A.
- Advocated for the user by tracking common pain points and reporting them to the product team, helping to get bugs fixed and new features prioritized.

HeyBubble | Intern**2011 - 2012**

- Directed product roadmap and prioritization, balancing user requests against business goals to ensure the team stayed focused on high-value features that drove revenue.
- Built a cross-functional feedback loop to validate ideas through user testing before development, successfully cutting down on wasted engineering hours and "re-work."
- Analyzed KPIs and user behavior to pinpoint friction in the funnel; launched data-backed updates that directly improved retention and platform growth.
